

DA Assignment No.2

Name:Mital shah

Dashboard:

Key Findings and Insights

1. Total Sales Performance: The dashboard highlights a total sales value of approximately 3.22 lakhs with 5510 units sold. The average unit price across all products is around \$55.67, indicating mid-range product pricing.

2. Gender-Based Sales Trends:

- Female customers show higher total purchases in categories like Food & Beverages (59.08%) and Fashion Accessories (56.05%).
- Male customers dominate in Health & Beauty with 62.27% of the total sales, suggesting product preferences vary by gender.

3. Gross Income by Product Line:

- 'Sports and Travel' and 'Health and Beauty' are top contributors to gross income, each contributing around 17%.
- Income distribution is fairly balanced among all product categories, ensuring risk diversification.

4. Gross Margin Performance:

- The highest gross margin percentage is observed in 'Fashion Accessories' followed closely by 'Food and Beverages' and 'Electronic Accessories', indicating these are high-profit areas.

5. Sales Quantity and Trends:

- The line chart shows sales income comparison by gender for each product category, with notable trends such as male preference in Health and Beauty and female preference in Food and Beverages.

6. Business Implication-

These insights help optimize marketing strategies, focus on profitable segments, and customize offerings based on gender preferences to maximize returns.
